

MA-HW SILVER WEATHERPROOF HARDWARE

The ultimate trailer tracking solution with LTE connectivity and advanced fail-safe features that ensure your assets remain secure and monitored, even in the most challenging conditions.

PERFECT FOR: Detachable trailers, commercial fleets, logistics companies.

KEY FEATURES: Weatherproof, tamperproof, virtual ignition mode, aggressive tracking.

MA-HW SILVER

WEATHERPROOF HARDWARE - 4G LTE DEVICE

- ✓ Weatherproof and tamperproof housing
- ✓ 4G LTE connectivity
- ✓ Versatile update frequency (12hrs-1min)
- ✓ 2-Day backup battery
- ✓ Virtual ignition mode
- ✓ Aggressive tracking for theft recovery
- ✓ High quality housing enclosure
- ✓ Internal backup battery

The MA-HW Silver may cost a bit more than some of our other equipment but you get what you pay for and this bit outshines the rest in every way.

This is the most versatile piece of hardware Matrack has to offer, serving both as an asset tracking device and a telematics system with all its own additional fail-safe features.

The hardware can be set to update between once every 12 hours all the way to once every minute. Not to mention the MA-HW SILVER is virtually weatherproof and tamperproof, making it ideal for trailers and valuable transport assets that need reliable tracking in all conditions.

Data Network: LTE (FDD)

Dimensions: 74 x 45 x 19.5 mm

Weight: 102 g (with event cable)

Key Features & Benefits

Virtual Ignition Mode

Connect all 2 (red, black) wires during the installation. It is the default mode of operation and all functions are operational.

2-Day Battery Backup

In the case of power failure, this tracking unit activates an internal battery connected to a specialized motion sensor that sends tracking updates based on the movement of the vehicle.

Aggressive Tracking Mode

Primarily a theft prevention/recovery function. When activated, it increases the frequency of tracking updates to follow the transit of missing assets so authorities can be alerted.

Geofence Tracking Trigger

Build an invisible perimeter around designated assets. If crossed, the owner is alerted immediately and Aggressive Tracking Mode is automatically triggered.

Real-Time Tracking & Travel Logs

Comprehensive tracking system with details on engine status, coordinates, street address, battery level, speed, mileage, and direction.

IFTA Fuel Tax Reports

Automatic calculation of required intrastate commercial vehicle reports based on miles driven through each state relative to fuel purchased.

Additional System Features

VARIOUS CUSTOM ALERT SETTING

Our customizable alert system lets you fine-tune your asset monitoring to fit whatever requirements you could ever need to meet. The system includes alert settings for speeding, ignition on/off, tow alerts, low battery, and more, providing complete control over your fleet monitoring.

DISPATCH MANAGER SYSTEM

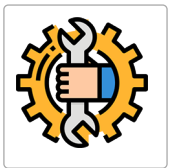

Our Dispatch Manager system is specifically organized to streamline working operations of fleet and trucking businesses. This system allows you to map out all jobs and deliveries directly into our Matrack GPS tracking platform, organize jobs based on priority, assign jobs and deliveries to your different drivers, and automatically map out the optimal routes from job to job, in order to optimize your businesses fuel efficiency.

ARRIVAL TRACKING SYSTEM

We give you a way to provide your clients with the means to track their deliveries in transit! Just let us know you want a tracking link for your customers and we will have you covered, improving customer satisfaction and reducing support calls about delivery status.

PREVENTATIVE MAINTENANCE ALERTS

Set your system to alert you anytime a vehicle maintenance is needed! This includes tire rotations, oil changes, and other critical maintenance tasks, helping to extend the life of your fleet and prevent costly breakdowns.

BLINK ROADSIDE ASSISTANCE

Matrack Inc. has partnered up with BLINK Roadside Assistance to provide you with heavily discounted rates on the most responsive emergency services available. This ensures that when breakdowns do occur, help is quickly on the way, minimizing downtime and keeping your assets moving.

Ready to secure your trailers?
