Analyze Your Fleet's Performance Over Time

Our intelligent and fully automated solution for IFTA compliance saves you hours of filing time and avoids costly errors. It can conveniently merge with your existing systems to give you peace of mind.

Benefits of Matrack MA-ELD

- ✓ Save Hours Of IFTA Tax Filing Time
- ✓ Advanced Violation Warning
- ✓ ELD Compliance
- ✓ Integrated Real-Time Tracking
- ✓ EDVIR & Defect Reporting

Key Features & Functionality

ELD Compliance

The MA-ELD Classic is DOT compliant and listed in the FMCSA's ELD approval list, ensuring your fleet meets all regulatory requirements.

DOT Log Transfer

One of the greatest advantages of having an ELD is to be able to transfer data files to security officers digitally.

HOS Logs

ELD has a complete set of steps to determine whether a CMV is in driving or non-driving status, ensuring accurate hours of service recording.

Idle Time Tracking

Once the speed of the vehicle comes down to 0 mph, and stays at that speed for more than three consecutive seconds, the ELD automatically switches to non-driving status.

Dashboard Summary

With a quick glance at our dashboard you can easily view and monitor KPI's like mileage, stop time, idle time, and speeding.

Geo Fencing

With Geofencing you can create GeoArea and assign particular vehicles to a specified GeoArea for improved monitoring and security.

Additional Features & Benefits

Travel Logs

View your travel log to see all data: Date, Time, Location Information, Engine Hours, Vehicle miles and more.

Real Time Alerts

Using GPS tracking unlimited alerts sent directly to your mobile device or email, you will know the location of driver activity.

Vehicle Inspections

Schedule and record the maintenance of your fleet vehicles for easy reminders based on mileage, engine hours or time.

Driver ID & Scheduling

Quickly assign or move individual drivers between vehicles for an effective tool that allows you manage your fleet, when drivers have access to their shared vehicles.

Automated Reporting

You don't have time to sit in front of your computer and monitor your fleet every hour of everyday. Our system automatically generates the reports you need.

Accident Reporting

GPS receiver has the capability of monitoring speed of a vehicle and detects accident based on monitored speed and send accident location to the server.

IFTA Fuel Tax

Our intelligent and fully automated solution for IFTA compliance saves you hours of filing time and avoids costly errors. It can conveniently merge with your existing systems.

Advanced Violations Warning

The Matrack ELD system provides violation details for current cycles as well as graph illustrations for break times, driver availability, remaining shift hours and remaining cycle hours for each shift.

Customizable Alerts

Alerts can now be customized to give you the exact information that you need. Create unique alert settings for different users.
